I am writing in support of the Madrona Waldorf School in support of the building project planned for the new school. The Madrona School really needs a new location for their school. I love the school and both my grandchildren are attending. Their policy of the outdoors and teaching children about the wonderful world around them is remarkable. I know the school will be good neighbors to all in the community. Please support their application to build. My husband and I have been Bainbridge Islanders for 52 years and fully support this project
