

By having the trash bin inside the secure parking area the gate has to be opened for every pickup. This would increase the Life Cycle Cost of this police station which has at least a fifty year life.

This is backwards, the “Sally Port” should have the overhead doors and fenced wall.

A diagram showing a building facade with a cantilevered balcony. The balcony is supported by a thick concrete slab that extends from the building's structure. The balcony floor is dark grey, and the railing is a simple metal balustrade. The building facade is light grey with vertical lines indicating windows or panels. A red line indicates the edge of the balcony slab. The ground is shown in a dark grey, textured area.
