Hi Ellen,

Thanks again for your support on this! I just responded to Ms. Redfield and outlined our plan going forward. I'll let you know if I hear from any other community members.

Olivia and Heather –

I'd like to stay in the loop on the conversations with Ms. Redfield and others who contacted the City in regards to this meeting, as well as the plan going forward.

Thanks so much,
Ellen

Colleen:

Thank you for this email. I wasn't at the meeting and so am not 100% clear on what the A/V issue was, but it is often the case that document formats change when they are projected onto the overhead. That may be what happened here, and I understand that you may have had some additional follow-up and info from Planning staff that I hope helped to clarify.

I'm glad you made time to attend the meeting, and I hope you were able to access any materials that were provided that evening but were not easily viewed at the time.

Thank you, Morgan

Subject: Fwd: Projector Lightbulb

Dear Morgan, Christine and Kelly,

I attended the meeting on Monday evening concerning the Hotel that is planned for Winslow Way. The room was full, indicating there is much interest in learning about this project. However, the drawings that were projected on the overhead screen were illegible due to a blown out lamp in your overhead projector. The speaker noted they looked fine on the desk computer in the meeting room, just not on the overhead screen which is employed for communicating to the meeting attendees.

I am hoping someone at the City can remedy this situation before the next public meeting. I understand the cost of this type of projector lamp is expensive but what is the use of offering an overhead projector as a visual device if it doesn't work? The photographs were visible, just not any of the drawings.

I hope this can be fixed quickly so the public's time is not wasted at the next meeting.

Best regards,
Colleen
