Subject: Wuensch SPT PLN20977

Hi Ellen,

I spoke with Cheryl Wuensch earlier this morning. She had some questions about the fire hydrant requirement. I think I was able to answer all of her questions. She did ask about the timing of the installation of the new hydrant. I am okay with the installation being deferred until any development occurs with the new lot being created. That is the catalyst for the new hydrant. I am not sure how this may fit into the planning process, but wanted to let you know where I stand on the issue.

Please let me know what you think. Thanks.
