Subject: Wyatt Apartment comments

Kelly Tayara,

I am writing this in response to the notice in regards to comments on the Wyatt Apartments, and I am requesting that you send this to the appropriate department, as well as to the members of the city council, as I do not have email addresses for anyone other than for you.

I am concerned that there is not enough attention being paid to how much water we have available on the island, and whether there is actually enough water for all of the developments that are being approved, including the one on Wyatt Way.

There is a Sole Source Aquifer here, and the future of the entire island is in jeopardy with the possibility of there not being enough water, due to lack of adequate planning and monitoring.

I want to know that the council has studied this issue, and is convinced and can demonstrate that there is enough water for the existing residents, as well as for any new projects, before any further developments are approved. I want to hear this information directly from the city council in response to this email.

Thank you,

Joan Phillips
