Subject: Bloedel Reserve development

I am very concerned about proposed development at the Bloedel Reserve. I live on Agate Pass Rd and along with my wife, frequently run, walk our dogs, and ride around Agate loop, The Reserve's plans for increasing visitorship will clearly have a negative effect on our safety and quality of life. The neighborhood is entirely residential, has no sidewalks or safe road shoulders, and many "blind" turns and hills. The speed limit is 35 mph and is typically exceeded. It should be noted that other places on the Island, Wyatt Way for example, have clear views and sidewalks with a speed limit of 25 mph!

Beyond creating more parking lots, food and beverage service, and a gift shop, I am particularly concerned about encouraging large buses to visit the Reserve. Imagine walking your dog through a blind turns on narrow two lane roads and facing giant, noisy buses!

Please, reject the proposed development at the Bloedel Reserve and protect the quality of life and safety of our residential neighborhood.
