Planning Dept.

Why must we learn so late of yours plans to support a hotel a big all inclusive hotel right in the middle of our small city. The parking they propose is not enough so we will be further strapped for adaquate places to park. Why is it we find out about these projects after they are given approval. I think we need to look

closer at how our planning commission is appointed and how it comes to these conclusions We successfully stopped an unneeded bridge built across 305. Hopefully we can stop the size of this proposed hotel from ~~com~~ changing the whole personality and livability of our city.
