**Subject:** COMMENT - Proposed Hotel Winslow

My recommendation is that the City require on site parking for anticipated maximum usage of the facility, which was something like 180.

**Either increase the on site parking, or reduce the number of rooms until parking can accommodate maximum anticipated usage with no overflow to on-street or other privately owned properties.**

For decades COBI has, and continues to have, a habit and reputation for not requiring adequate parking for usage of structures in Winslow. WINSLOW DOES HAVE A PARKING PROBLEM, as much as there is denial of this fact.
