Regarding Project White RUE&VAR, PLN51498 RUE/PLNS51498 VAR

Sent via Email.

We are the owners of a parcel downstream of the proposed project. We do not object to the project but would like to be assured through the review process that the septic systems and proposed changes to wetlands and season water runoff do not adversely impact ground water quality. We are dependent on a private well on our property for our freshwater supply. A poorly done septic system given the proximity to the wetlands conceivably may be detrimental to general ground water quality downstream.

Sincerely,

Doug Forsyth
