To whom it may concern,

please note my extreme concern about the proposed development on Lytle near Pleasant Beach Dr. I can see many issues with this project. The main one though, to my mind, is the fact that it impacts adversely the wetland. we have regulations in place to protect our critter neighbors - including salmon. Can we please enforce them and disallow any development that impinges on wetlands?

As a side note, the relevant developer has built in the area previously and caused their neighbors' houses to flood. Isn't it legally foolish to allow the same person to cause the problem again - let alone from an obvious moral one?
