Subject: RE: wetland delineation, revised

Hi Annie,
Regarding the wetland report for parcel 4167-000-024-0003 dated 10/10/2018.

A few items are missing from the rating form and therefore the report is incomplete, namely:

- a map of the 'Hydroperiods' is needed to answer question D1.4 and H1.2
- a map of the 'Boundary of area within 150 ft of the wetland' is missing from figure 3 and is needed to answer question D2.2 and D5.2
- a map of the 'Cowardin plant classes' is missing from figure 4 and is needed to answer question D1.3, H1.1 and H1.4
- the math is not shown on question H2.1 or H2.2
- question H2.3 needs to be justified

Even with these discrepancies, the wetland boundary has not been substantially revised nor has the wetland rating been altered.

Thanks,
Christian

Hi Christian,

When you have moment, can you email me a list of the items that you found to be missing from the report? My understanding is that these do not impact the category of the wetland (IV) or its required buffer, or its boundaries, so they are not a deal-breaker. But I do want to make note in the file that we are aware these items were not submitted (and also for the biologist's future reference). Thanks so much for your help!!!

-Annie

Subject: wetland delineation, revised

Hi Christian,

You reviewed this wetland delineation and rating a while back, and recommended that the figures on page 2 of the rating forms be included in the report, and that the math for question H 2.0 on page 14 also be included. I've received the revised report, and see that figures have been added – but I'm not sure where to look for the math work that may or may not have been added. Would you mind giving me a hand? I've attached the revised report.

Thank you!
