Subject: Winslow Hotel

Besides not being in compliance with the BI Comprehensive Plan, the developer of the Winslow Hotel project seems to be "buying indulgences" from any department that will let him. Promises to be green does not mitigate the increased traffic, lack of parking, impact on the residential neighbors and the whole downtown core, and 2 years of construction chaos. If the developer wants to be green, he should not build at all. If approved, this project would set a precedent that doesn't represent Bainbridge Island.

The Planning Commission has recommended a decision to deny the permit for this project. We encourage you to deny the permit also.

Thank you,
Terry and Ruth Adams
