Hi Ellen,

I now have the copy of the drawings (attached). My day is flexible and I'm happy to set it up on the projector for a test anytime today. Let me know what works best for you. Thanks!

Hi Olivia,

Thanks for explaining the situation of the Monday meeting. We agreed that you'd get a copy of the drawings that were difficult to see for testing purposes - please let me know when you've been able to get a copy so that we can test.

Thanks - Ellen

Dear Morgan, Christine and Kelly,

I attended the meeting on Monday evening concerning the Hotel that is planned for Winslow Way. The room was full, indicating there is much interest in learning about this project. However, the drawings that were projected on the overhead screen were illegible due to a blown out lamp in your overhead projector. The speaker noted they looked fine on the desk computer in the meeting room, just not on the overhead screen which is employed for communicating to the meeting attendees.

I am hoping someone at the City can remedy this situation before the next public meeting. I understand the cost of this type of projector lamp is expensive but what is the use of offering an overhead projector as a visual device if it doesn't work? The photographs were visible, just not any of the drawings.

I hope this can be fixed quickly so the public's time is not wasted at the next meeting.

Best regards,
Colleen
