Subject: Lapinski Dock, PLN51157 SSDP and SVAR

As a resident of Bainbridge Island, I am asking you to please reject the request for a shoreline variance for the Lapinski Dock at 6150 NE Eagle Harbor Drive. A 154 foot dock would extend far into public property, blocking right of way used by numerous members of the public, including high school students on the rowing and sailing teams, kayakers, and motorists. This dock would be far longer than anything else in Eagle Harbor, creating an unsafe navigation hazard. It would also destroy salmon habitat that is critically important to the future of our endangered southern resident orcas.

Please reject the request for a variance and a duplicative mooring buoy.

Thanks for your consideration,

Dave Freeburg
