Hello Ellen,

Please find attached a scan of a survey collected on July 12 & 13 midway along the trail located between Koura and Bayhill, north of Mandus Olsen. The survey was performed by Gene Earlington-Smith who lives adjacent to the trail two houses north of the short plat property. The survey as posted was quite informal, written on cardboard, with a signing sheet and set on a chair next to the trail. See accompanying picture. Over the period 46 names with addresses were collected. Please add the survey to the public record.

I will stop by later today and leave a manila envelope with your name on it at the reception desk that includes the original survey and sign.

Thank you,
Steve Matthews
