Attachments: Wysong Ziemba Joint-Use Pier,Ramp,Float & Boat Lifts Project Suquamish Tribe Inadvertent Discovery Plan Feb 19, 2020.pdf

Hi David,

Thanks again for the additional project information. Due to the high probability for undocumented cultural resources at the Wysong/Ziemba property, we are concerned about the work associated with the pocket beach. The narrative described removing quarry spalls but also removing part of the non-functioning bulkhead. It is not clear how much of the bank behind the bulkhead will be exposed, disturbed and/or excavated. Could we condition the project to have us be present to inspect ground disturbing activities for the pocket beach expansion, and also include this attached Inadvertent Discovery Plan as a part of the permit condition for the Wysong/Ziemba Joint-Use Pier, Ramp, Float & Boat Lifts Project (PLN50280C SSDP & SVAR)?

Thank you for allowing us to comment on this project,  
Stephanie

P.S. Stephanie,

Attached are the revised site plans (upland features no longer proposed).

Dave

Subject: Request for more information about the Wysong-Ziemba new joint use pier/ramp/float PLN50280C SSDP & SVAR

Hi David,

Could we have more information regarding the Wysong-Ziemba new joint use pier/ramp/float at 6789 NE Bergman Rd (PLN 50280C SSDP & SVAR). Will it be in the same footprint as the existing dock, just extend longer? Will there be much ground disturbance at the shoreline? The property has a high probability for undocumented cultural resources.

Thanks for the additional information,  
Stephanie

**SUQUAMISH TRIBE  
ARCHAEOLOGICAL RESOURCES INADVERTENT DISCOVERY PROCEDURES**

**PROJECT:** Wysong/Ziemba Joint-Use Pier, Ramp, Float & Boat Lifts Project

**PERMITTING AGENCY:** City of Bainbridge Island

**PERMIT NUMBER:** PLN50280C SSDP & SVAR

**AGENCY CONTACT:** David Greetham, Planner

This Inadvertent Discovery Plan (IDP) outlines procedures for supervisors and construction personnel when archaeological materials or human remains are identified during construction activities such as trenching, grading, bulkhead removal, or other ground disturbance. These procedures shall be followed to meet permit requirements and state and federal laws

**The project proponent and contractor shall notify Suquamish Tribe archaeologists of the planned start date of construction at least two weeks prior to the start of construction excavation.**

**PROCEDURES FOR DISCOVERY OR IDENTIFICATION OF PRE-CONTACT OR  
HISTORIC PERIOD ARCHAEOLOGICAL DEPOSITS**

Construction personnel will follow procedures in this document if archaeological materials are identified, such as:

- a. An accumulation of shell, burned rocks, hearths, pits, or other materials.
- b. Bones or small pieces of bone.
- c. An area of charcoal or very dark stained soil with artifacts.
- d. Stone tools or waste flakes (i.e. an arrowhead or stone chips).
- e. Clusters of tin cans or bottles, logging or agricultural equipment that appears to be older than 50 years.

When in doubt, assume the material is a cultural resource and contact appropriate authorities.

1. If any employee, contractor, or subcontractor believes that he or she has uncovered a cultural resource at any point in the project, all work must stop immediately. Notify the appropriate party(s). The contractor shall leave the surrounding area untouched and secure an area with a perimeter of not less than 30 feet until all consultations and analyses are completed and the parties agree that construction activities can resume. The discovery location must be secured at all times by a temporary fence or other onsite security.

No one shall excavate any cultural material and all cultural material will be left in place, undisturbed and without analysis, until consultation with the Department of Archaeology and Historic Preservation (DAHP) and the Suquamish Tribe.

2. If a contractors' or sub-contractors' employee is the person making the discovery, such person shall immediately notify his or her supervisor and that supervisor shall immediately notify the Suquamish Tribe of the discovery.

3. The Tribe shall notify DAHP of the discovery as soon as possible. If the discovery is made after Tribal business hours, the contractor shall contact Dennis Lewarch on cell (360) 509-1321. If human remains are found, the contractor shall follow notification procedures specified below.

4. The Tribe shall arrange for the parties to conduct a joint viewing of the discovery within 48 hours of the notification, or, if that is not feasible, at the earliest possible time thereafter. After the joint viewing, taking into account any recommendations of the Suquamish Tribe and DAHP, the parties shall discuss the probable significance of the discovery and requirements for follow-on work.

## **PROCEDURES FOR DISCOVERY OR IDENTIFICATION OF HUMAN REMAINS**

Construction work in an area will be stopped if any human remains are identified. The contractor will notify the Kitsap County Sheriff's Office, the Kitsap County Coroner, DAHP, and Suquamish Tribe archaeologists, and follow procedures outlined herein.

1. All persons shall immediately cease or halt ground disturbing, construction or other activities around the area of the discovery and the contractor shall secure the area with a perimeter of not less than 30 feet until all procedures are completed and the parties agree that construction activities can resume. No one shall excavate the remains and the remains shall be left in place, undisturbed and without analysis. Treat human remains with dignity and respect at all times. Cover the remains with a tarp or other materials (not soil or rocks) for temporary protection and to shield them from being photographed. Do not call 911 or speak with the media. Do not take pictures. The Kitsap County Sheriff's Office and Kitsap County Coroner will determine if the human remains are forensic or non-forensic. If the Kitsap County Coroner determines that the human remains are non-forensic, the coroner will notify DAHP and the Suquamish Tribe. The Washington State Physical Anthropologist will make an initial determination of whether the human remains are ancient and are Indian or non-Indian. If the remains are Indian, DAHP will notify the Suquamish Tribe.

2. After identification of the human remains as non-forensic Indian, the contractor shall continue to maintain the remains and any associated funerary objects in place, covered, unwashed, unexamined and undisturbed until their final disposition to the Tribe. The contractor shall give due consideration to and honor, to the extent possible, any request by the Suquamish Tribe to leave the remains and/or other cultural items permanently undisturbed and in place. The contractor will honor and accommodate any request by the Tribe or by Tribal members to conduct ceremonies or other traditional activities with respect to the human remains at the site where the remains were found.

3. Where human remains are identified as Native American, the Tribe may request either that the remains remain in place or that they be removed and repatriated to the Tribe. If the Tribe requests that the human remains remain in place, then the contractor shall cover the remains or, if the remains had been disinterred, rebury the remains at or near the site where the remains were uncovered.

4. Human remains, funerary objects and/or other artifacts identified for repatriation shall be placed in plain paper bags in lots as large as possible and delivered to the Tribe within a reasonable time after the Tribe makes its request. At the time of transfer, DAHP shall provide to the Tribe a brief description of the remains, objects and/or artifacts transferred and the Tribe shall confirm receipt of the same.

### **CONFIDENTIALITY OF INFORMATION**

1. All parties recognize that archaeological properties are of a sensitive nature and sites where cultural resources are discovered can become targets of vandalism and illegal removal activities. All parties shall keep and maintain as confidential all information regarding any discovered cultural resources, particularly the location of known or suspected archaeological property, and exempt all such information from public disclosure consistent with RCW 42.17.310(k).

2. All information indicating the location of known or suspected archaeological properties shall be turned over to the Tribe. While any party is in possession of this confidential information, such party shall limit access to these records to authorized persons with a need to know the information and shall keep a log identifying all persons who access the record, that person's governmental agency or private affiliation, the date the access was permitted, any materials copied, and the purpose and for whom such records were copied. DAHP will keep all information received permanently secured and confidential.

3. All parties shall ensure that its personnel, contractors, and permittees keep the discovery of any found or suspected human remains, other cultural items, and probable historic properties confidential, including but not limited to, refraining such persons from contacting the media or any third party or otherwise sharing information regarding the discovery with any member of the public. All parties shall require its personnel, contractors and permittees to immediately notify the agency of any inquiry from the media or public. The agency shall immediately notify the Tribe of any inquiries it receives. Prior to any public information release, the Tribe will determine the amount of information, if any, to be released to the public, any third party, and the media and the procedures for such a release, to the extent permitted by law.

### **LEAD REPRESENTATIVES AND PRIMARY CONTACTS**

The project proponent will complete sections of this form listing the proponent's name and contact information and contact information for the contractor and transmit the form to the Suquamish Tribe prior to construction and as part of the project permit conditions.

The form should be sent to:

Dennis Lewarch, Tribal Historic Preservation Officer  
Archaeology and Historic Preservation Department  
Suquamish Tribe  
P.O. Box 498  
Suquamish, WA 98392

The lead representatives and primary contacts of each party shall be identified. The parties may identify other specific personnel before the commencement of any particular portion of the project as the contacts for that specific project. The parties shall notify the other parties in writing whenever the assignment of lead representative or primary contact has changed.
