Good morning Olivia,

Following up on our conversation of last week I am writing in support of the development, but with one significant exception. That being our opposition to the request for a height variance of an additional 5'. I have attached to this email a digital copy of our letter opposing the request for a height variance. A fully signed copy of this letter is being delivered to your office this morning.

I understand the hearing examiners date for this project is most likely to be changed from August 1st until later in the month and we look forward to receiving new details.

Thank you

Christopher Brookes

HOA Board Director
