Proposed development on Lytle Road near Pleasant Beach (Lytle beach)

This is fragile land, this wetland is a critical area. Please do not allow this land to be built on. I have read the request and it is not reasonable. The sound is near by and we must protect our sound.

The rains on this street cause floods bringing large amounts of water to the sound. You know this cannot be clean water going into the sound. I have personally seen these floods.

The wetlands, forests and wildlife are in a losing battle with COBI and construction proponents, and your help is needed to stop this destruction of the natural resources and beaches we value on Bainbridge Is.

I personally, have taken on the responsibility of keeping the grass in the wetland at Lytle beach clear of scotch broom, litter and junk people dump there. The sea grass has never been cut at this site. I am the watchman of this wetland because I live close by and can keep a close watch on it.

Lytle beach is used by many families, let's keep this water clean. There is a road end there for public use but the rest of the beach is owned by our community. We voted to let the public use it. We keep it clean of trash and dog poop. I have read that the water quality is not good at Lytle beach and it is recommended to take a shower after swimming there. Please do not add to this problem

The owner of this property has been mowing the tall grass in the creek and in the no-disturbance Restoration Zone.

This proposed construction should be illegal, sewage from the property will flow down to the beach in heavy rains. Please help us keep Lytle Beach water clean.

Thank you,

Bonny Danielson
